The latest in our VR Series of highly evolved bowriders the VR4 is easy to tow launch and store and really fun to use. The smallest VR Series model delivers plenty of interior space thanks to our BeamForward design which carries the full beam further forward for more comfort and capacity than traditional pointed bows. Our AftAdvantage design increases the rear seating area by shifting it to the aft-most point of the running surface allowing the swim platform to extend beyond that. That means more room for comforts like movable backrests for versatile seating configurations available bow wind block and optional filler cushion that together create an additional bow seat optional sun pad cushion inserts that expand the sunbathing area and plenty of convenient storage throughout.

1. BeamForward" design with high gunnels creates more passenger space, under-seat storage and safety
2. Roomy cockpit thanks to our exclusive AftAdvantage" design
3. Spacious bow seating converts to inviting lounge with addition of optional bow filler cushion
4. Extra passenger seat created in bow by adding an optional bow wind block (requires bow filler cushion)
5. Contoured backrests for comfortable lounging on the swim platform
6. Optional sun pad inserts increase surface area for sunbathing comfort
7. Standard sport style windshield or optional windshield with opening center panel and side wings
